SUMMARY

Backend software engineer and web developer at SQLI in Paris, working with PHP, Symfony, Ibexa and Shopware, and bringing AI-assisted workflows (AI agents, MCP) into delivery. Founder of Open Prompt Registry and solo creator of Loasis, a real-time multiplayer browser game with self-hosted voice chat. Built an accreditation platform that handled 3,500+ participants from 54 countries.

PROFESSIONAL EXPERIENCE

Web Developer (Permanent) | SQLI
Oct 2024 – Present | Paris, France

- Lead ongoing maintenance and optimisation for a major insurance client's web platform.
- Integrate AI-assisted workflows (AI agents, MCP skills) to shorten delivery times and automate code checks.

Web Developer (Internship) | SQLI
Feb 2024 – Aug 2024 | Paris, France

- Improved an open-source SQLI bundle for Ibexa and Symfony, with strict code-quality standards and automated tests.
- Built custom Shopware plugins meeting the complex requirements of an e-commerce client.

MERN Web Developer | Tunisian National Olympic Committee
Apr 2023 – Jul 2023 | Tunis, Tunisia

- Delivered the accreditation platform for the African Beach Games, registering 3,500+ participants from 54 countries (React, Node.js, Express, MongoDB, WebSockets).

Laravel Web Developer | Carolina Tunisian Group
Jul 2022 – Sep 2022 | Tunis, Tunisia

- Designed and built a high-traffic e-commerce platform end to end with Laravel, optimising the purchase journey.

Laravel Web Developer | Greenex
Jan 2021 – Jun 2021 | Tunis, Tunisia

- Built an ERP automating production-data entry, making the company's management tool faster and more flexible.

PHP Web Developer | Tunisair
Jan 2020 – Feb 2020 | Tunis, Tunisia

- Built a statistics tool extracting and analysing data from complex B2B booking XML feeds.

PROJECTS

Loasis (Oasis Plaza) | Solo Developer and Creator

2026 | playloasis.com | Featured on TGTV

- Real-time 2D multiplayer virtual café playable in the browser on PC, tablet and mobile, with Chkobba, Checkers, Chess and Ludo, friends, online presence and AI bots.
- Custom game engine built with AI agents, including in-game map and decoration editors.
- Self-hosted LiveKit (WebRTC voice chat) and a custom WebSocket server, deployed on a dedicated, secured VPC.

Open Prompt Registry | Founder and Developer

May 2025 – Present | opregistry.com

- Designed, built and deployed a platform to organise, version and share AI prompts, with a collaborative space for prompt engineers (Next.js, TypeScript, Prisma, NextAuth.js).

EcoWarriors | Academic Project, ESPRIT

Jan 2023 – Jun 2023

- Gamified platform combining social network and education to promote sustainable development. Awarded "Best Project" (React, Express, MongoDB, Leaflet, WebSockets).

EDUCATION

Engineering Degree in Computer Science, Web Technologies | ESPRIT

Sep 2021 – Aug 2024 | Ariana, Tunisia

International Exchange, Data Intelligence | ESEO

Sep 2023 – Jan 2024 | Vélizy, France

Applied Bachelor's Degree in Computer Science, Information Systems Development | ISET Radès

Sep 2019 – Jul 2021 | Radès, Tunisia
